

SmartTrace™ High Temperature

APPLICATION INSTRUCTIONS FOR CATALYTIC CONVERTERS

WHAT IS SMARTWATER® SMARTTRACE™ HIGH TEMPERATURE?

SmartTrace™ High Temperature is specially formulated to tolerate extreme temperatures, providing an effective and robust means for protecting your Catalytic Converter.

SmartTrace™ is simply brushed on to your Catalytic Converter, providing instant protection. The liquid contains a unique forensic code that creates an irrefutable link back to the vehicle in the event of a theft and subsequent recovery.

Because of SmartWater's ability to link offenders back to the scene of their crime, the SmartWater brand serves as a powerful deterrent.

In fact, 74% of criminals said they would not commit a crime at a location displaying SmartWater deterrent signage.*

HEALTH & SAFETY / FIRST AID

Keep SmartTrace™ out of reach of children. SmartWater suggest that gloves and eye protection are used where appropriate. Please clean up spillages, they can create a slip hazard. Contact with eyes: rinse with plenty of water for at least 15 minutes. Contact with skin: immediately wash the area with soap and water. Swallowing SmartTrace™: wash out your mouth with water and consult your doctor if any symptoms develop.

Please dispose of any out-of-date or unwanted SmartTrace™ in accordance with your policy for the disposal of controlled waste. This work must be carried out by a contracted service provider or by your local authority and is a legal requirement (Environmental Protection Act, 1990). Please remove all labelling from the bottle prior to disposal to ensure no one else attempts to use or register your SmartTrace™ forensic liquid. The SmartTrace™ forensic liquid in this bottle is valid for your address only. Please refer to www.smartwater.com/coa for instructions on how to change your registered address or other contact details.

WHERE SHOULD I APPLY SMARTWATER SMARTTRACE™ HIGH TEMPERATURE?

ONLY apply SmartTrace™ to catalytic converters.

Once applied SmartTrace™ may leave a pale white mark.

There is a range of other vehicle products available at <https://shop.smartwater.com/>

STEP 1

Make sure the engine is off and allow it to cool before application. Ensure that all areas you plan to mark are clean and dry before applying SmartTrace™. Avoid smooth surfaces, instead apply to those that are uneven or irregular.

STEP 2

Shake the bottle for approximately 10 seconds before use.

STEP 3

Insert the applicator into the bottle, collecting a small amount of liquid.

Apply 3 layers of 2-3cm line of SmartTrace™ to the same area with 30 minute intervals between each layer.

STEP 4

Apply SmartTrace™ to the area you have selected. This will be sufficient to recover the unique code, should the catalytic converter be stolen and later found.

THINGS TO AVOID

- > **DON'T** dilute your SmartTrace™ forensic liquid.
- > **DON'T** write with the liquid.
- > **DON'T** apply to smooth surfaces.
- > **DON'T** apply the liquid in conditions in which frost can form.
- > **DON'T** apply when engine is on.
- > **DON'T** apply when catalytic converter or other components are hot.
- > **DON'T** smoke while applying the liquid.

SmartTrace™ is best stored at room temperature.

STEP 7

Once you finished applying SmartTrace™, the applicator needs to be placed back in the bottle and stored securely, so that it can be used again if required.

STEP 6

IMPORTANT!
Register at www.smartwater.com/registration to ensure marked assets can be identified if lost or stolen.*

STEP 5

Place the supplied deterrent signage on the bumper of the car, above the exhaust pipe and on the inside of the windows.

*If purchased directly from SmartWater online this will have already been registered.
