

SmartTrace[®]

APPLICATION INSTRUCTIONS FOR MOTORCYCLES

0800 141 2543 | www.shop.smartwater.com

> RE-APPLYING SMARTTRACE™

If re-applying SmartTrace™, please attempt to apply the new liquid to areas that have not, previously, been marked. If uncertain, please check for the presence of a previous application using an ultraviolet light (long wave, 365nm) - where any areas previously marked will glow a bright yellow-green. By following these instructions, you will help simplify analysis in the event of theft and subsequent recovery of the marked item.

> HEALTH & SAFETY / FIRST AID

Keep SmartTrace™ out of reach of children. SmartWater suggest that gloves and eye protection are used during application. Please clean up spillages, they can create a slip hazard. Contact with eyes: rinse with plenty of water for at least 15 minutes. Contact with skin: immediately wash the area with soap and water. If SmartTrace™ has been accidentally swallowed: wash out mouth with water and consult a doctor if any symptoms develop.

> DISPOSAL INSTRUCTIONS

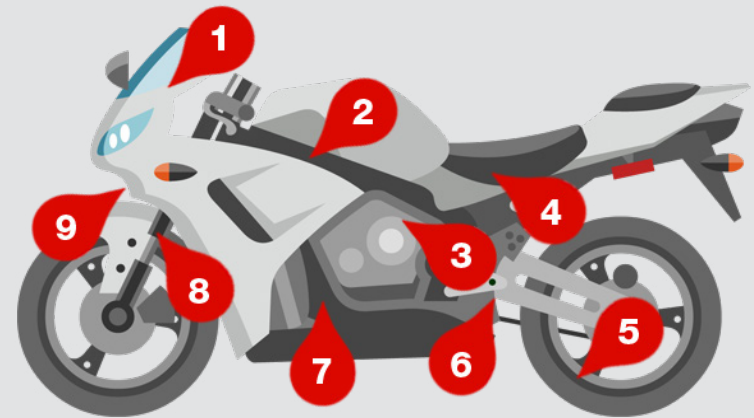

SmartTrace™ forensic liquid is water-soluble and not harmful to the environment. Any out-of-date or unwanted liquid can therefore be safely disposed of by thoroughly diluting the liquid and pouring it down a sink with plenty of cold water. SmartWater will not accept liability for any damage to property if the Application Instructions are not followed. The SmartTrace™ forensic liquid in this bottle is valid for one vehicle only - please notify us in writing if you change your vehicle. Please refer to www.smartwater.com/coa for instructions on how to update your address details.

WHERE SHOULD I APPLY SMARTTRACE™?

1. Instrument binnacle (around clocks)
2. Under fuel tank
3. Frame
4. Under seat
5. Wheels
6. Swingarm
7. Engine casing
8. Forks
9. Inside fairing

*PLEASE NOTE:

Catalytic converters and exhaust components require SmartTrace™ High Temperature forensic liquid.

STEP 1

Ensure that all areas that you plan to mark are clean and dry before applying SmartTrace™. Avoid smooth surfaces and apply to those that are uneven or irregular. See overleaf for recommended areas to mark.

STEP 2

Shake the bottle for approximately 10 seconds before use.

STEP 3

Insert the applicator into the bottle, collecting a small amount of liquid.

STEP 4

Apply a small dab to the areas of the motorcycle you wish to protect. This will be sufficient to recover the unique code, should the asset be stolen and later found.

 The liquid is touch dry within 30 minutes, but will take 24 hours to cure completely.

THINGS TO AVOID

- > DON'T dilute your SmartTrace™ forensic liquid.
- > DON'T write with the liquid.
- > DON'T apply to smooth surfaces.
- > DON'T apply while the engine is running.
- > DON'T apply the liquid in conditions in which frost can form.
- > DON'T apply the liquid to functional parts such as electronic ports or displays.
- > DON'T apply the liquid to external surfaces if it is raining.
- > DON'T apply the liquid to moving parts such as nuts, keys or switches.

SmartTrace™ is best stored at room temperature.

STEP 7

Once you finished applying SmartTrace™, the applicator needs to be rinsed under a tap, stored securely and the lid replaced on the bottle, so that it can be used again if required.

STEP 6

Register at www.smartwater.com/registration to ensure marked components can be identified if lost or stolen.*

STEP 5

Place the supplied deterrent signage on the the inside of the windshield and outside, on the body of the motorcycle in an easily visible area.
